August 5, 1937

Dr Louis A Warren
Director
Lincoln Nat'l Life Foundation
Fort Wayne, Indiana

Dear Dr Warren:

Thank you very much for the copy of "Heroic Statues in Bronze of Abraham Lincoln." I notice that in this is Mr Franklin B Mead's card. Should I write him a formal note of thanks?

The photostats arrived with the book, and we are certainly thankful to you and the Lincoln Foundation for your wonderful cooperation. I will not hold up the photostats I promised you until we finish all of them, but will forward them to you from time to time as the photostatic department delivers them to my office. I may send you some duplicates of material you already have, but I think much of mine on the assassination will be new to your files.

Already there are fifty Lincoln pennies in the coin card, and it came in just yesterday! One of the chaps in my office claims he has a whole box filled with Lincoln pennies that he will bring down. So you see, you have started me off on an entirely new hobby.

Please don't go to a lot of trouble for the Japanese book on Lincoln for Joyce. She will be delighted to have it at any time it may come.

The McGuffey meeting at Oxford went off very well and I managed to get through my part of the program without forgetting any of my speech. I am now looking forward to the time you can visit Detroit and spend a few hours with us going over our files. I want to show you how poor they are in comparison with the wonderful job you have done with yours.

Sincerely,

F L BLACK
