August 11, 1933

Mr. Fred Black,
Dearborn,
Michigan.

Dear Mr. Black:

I have just had the privilege of reading an affidavit made by an Ashley W. Crockett, stating that when you gathered your material for the story in the Dearborn Independent, you posed as a Government detective gathering evidence of the definite demise of John Wilkes Booth. May I ask you just as a matter of curiosity if there is any basis to this? I should also like to ask you whether you have a record of the people that you interviewed at Glen Rose Mills and Granberry.

The reports on the mummy are still pending. Since I saw you last spring a great deal of water has run down the dam and left behind it a changed topography. When the time is ripe you will hear from me on this.

Kindest personal regards.

Very truly yours,

Otto Eisenschiml
