William Harkness of the Naval Observatory

TRIAL OF JOHN H. SURRAT P 1022

Testified that the moon rose at 10:01 P.M. on April 14, 1865, that at 11:20 the sky was covered more or less with clouds and looked somewhat hazy. That the moon had been full on the 10th, that it was pretty far south its highest point not exceeding forty degrees altitude.
